SHUBHAM SHRIRANG GHODEKAR

Navi Mumbai, India | +91 9152065628 | ghodekarshubham87@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

AI/ML graduate (B.E. in Computer Science, AI & ML, University of Mumbai) building RAG pipelines and LLM agent workflows with LangChain, LangGraph, Langflow, ChromaDB, and Ollama. AI/ML Intern at Techstalwarts, working on a PDF field-extraction project and the company's AI transformation initiative.

EXPERIENCE

AI/ML Intern *Aug 2026 – Present*

Techstalwarts

- Built a PDF field extractor project for our Dubai Client (Sliceal)
- Contributed to the company's AI transformation initiative: RAG and multi-agent pipelines
- Applied prompt engineering, parameter tuning, and LLM APIs (Groq, OpenAI etc) to improve retrieval and inference quality

Mobile Application Development Intern *Jul 2022 – Aug 2022*

New Age Solutions Technologies (NASTECH) — Microsoft Partner

- Built UI screens, navigation flows, and application logic for cross-platform mobile apps using Flutter and Dart

TECHNICAL SKILLS

Languages: Python, JavaScript
LLM & Agentic AI: RAG, LangChain, LangGraph, Langflow, Prompt Engineering, Ollama, LLM APIs (Gemini, OpenAI, Groq)
Vector Databases & Embeddings: ChromaDB, Embedding Models, Semantic Search
Machine Learning & Data: Scikit-learn, Ensemble Learning, Feature Engineering, Model Evaluation (F1), Pandas, NumPy
Backend & Tools: FastAPI, Flask, REST APIs, Pydantic, React.js, Git, PyMuPDF (PDF Parsing), MySQL, SQLite

PROJECTS

Web-RAG

Python · FastAPI · Langflow · Chroma DB · Ollama · JavaScript | GitHub

- Built an end-to-end RAG system that turns any website into a queryable knowledge base: recursive crawling → text splitting → local qwen3-embedding via Ollama (no data leaves the host) → Chroma DB
- Solved multi-tenant isolation with a unique collection per source, injected into the Langflow retrieval component via the tweaks API, so one pipeline serves unlimited knowledge bases
- Built a FastAPI orchestrator with Pydantic models, multi-turn session tracking, per-request Gemini model/key override, and clear 504 / 502 / 400 error handling; wrote the chat client in vanilla JavaScript

Smart Resume Screener

Python · FastAPI · Google Gemini · PyMuPDF · React.js | GitHub

- Designed a hybrid scoring engine: Gemini (temperature 0, forced JSON output) judges qualitative fit while a deterministic 214-skill / 308-alias lexicon keeps skill and experience scores reproducible
- Implemented 5-component weighted ranking (skills 35%, experience 30%, education 15%, summary 10%, years 10%) with a date-range extractor that merges overlapping intervals to avoid double-counting
- Handled LLM failure modes (token budgeting, 503 retry, quota/auth errors); secured uploads and CSV export

Precise & Enhanced Webpage Fraud Detection

Python · Scikit-learn · Flask · React.js · Vite | GitHub

- Built a hybrid stacking ensemble (Random Forest + Decision Tree → Logistic Regression) on 111 features from 129,698 URLs: 99.0% accuracy / 98.8% F1, beating XGBoost (96.7%), CatBoost (95.2%), and KNN (94.5%)
- Designed a three-tier inference pipeline (allowlist → heuristic filter → ML model) with an SSRF-safe feature extractor
- Shipped a Flask REST API and React dashboard hardened with input caps, log-injection sanitization, and request-ID errors

EDUCATION

B.E. in Computer Science Engineering (AI & ML) — *University of Mumbai* *2023 – 2026*

Diploma in Information Technology — *Maharashtra State Board of Technical Education (MSBTE)* *2020 – 2023*
