📄 SUMMARY

AI/ML Engineer and Data Scientist with a B.E. in Computer Science Engineering (Artificial Intelligence & Machine Learning) from the University of Mumbai. Experienced in building and deploying end-to-end machine learning solutions with a track record of developing classification systems, automating workflows, and publishing research. Skilled in Python, NLP, ensemble learning, and full-stack ML deployment using Flask and React.js. Seeking AI/ML Engineer or Data Scientist roles to apply machine learning expertise in building intelligent, scalable solutions that drive real business impact.

🎓 EDUCATION

B.E in Computer Science Engineering (Artificial Intelligence & Machine Learning)

University of Mumbai | 2023 – 2026

Diploma in Information Technology

Maharashtra State Board of Technical Education (MSBTE) | 2020 – 2023

Secondary School Certificate (SSC)

Maharashtra State Board | 2020

🧠 TECHNICAL SKILLS

Languages & Development: Python, JavaScript, HTML, CSS, Dart, Flutter

Frameworks & Tools: Flask, React.js, Tailwind CSS, Git, Pickle, MySQL, SQLite

AI/ML & NLP: Machine Learning, Natural Language Processing, Scikit-learn, Ensemble Learning, SentenceTransformers, spaCy, TF-IDF, Generative AI

Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Excel, Statistical Analysis

📁 PROJECTS

Precise & Enhanced Webpage Fraud Detection System 🔗

Python, Flask, React.js, Scikit-learn, Ensemble ML, Tailwind CSS

- Built Hybrid Stacking Ensemble (Random Forest + Decision Tree → Logistic Regression) achieving 99% accuracy on 129,698 URLs with 111 features, outperforming XGBoost, CatBoost, and KNN
- Deployed full-stack web app with real-time Flask REST API, live analytics dashboard, and confusion matrix visualization using React.js + Recharts
- Research published at ACROSET 2026 via Microsoft CMT (Paper ID: 204)

Smart Resume Screening & Job Match Engine 🔗

Python, Flask, React.js, SentenceTransformers, spaCy, Tailwind CSS

- Built AI-powered screening system using SentenceTransformer embeddings and spaCy NER for semantic candidate-job matching with alias resolution and A–F candidate grading
- Designed weighted scoring model (skills 35%, experience 30%, education 15%, summary 10%, tenure 10%) with PDF/DOCX parsing and CSV export of ranked results

SMS Spam Detection System 🔗

Python, Flask, Scikit-learn, NLP, TF-IDF, Naive Bayes

- Built text classification model achieving 97.5% accuracy using Naive Bayes + TF-IDF on UCI SMS Spam Collection (~5,500 messages) with full preprocessing pipeline
- Deployed Flask REST API returning prediction + confidence score with <200ms latency and XSS-sanitized input validation

📁 EXPERIENCE

New Age Solutions Technologies (NASTECH)

July 2022 – August 2022

Mobile Application Development Intern – NASTECH (Microsoft Partner)

- Developed cross-platform mobile applications using Flutter and Dart.
- Built UI screens, navigation flows, and implemented application logic.
- Gained hands-on experience in the complete application development lifecycle and testing.

📄 CERTIFICATES

- **Oracle Cloud Infrastructure (OCI) AI Foundations Associate** – Oracle
- **Data Analytics Job Simulation** – Deloitte Australia (Forage)
- **Power BI Workshop & Dashboard Development** – Office Master
- **Build Your Own Generative AI Model** – NXT Wave
- **Introduction to Data Analytics** – Simplilearn
- **AI for Beginners** – HP LIFE
